Separazione

Schlüter[®]-DITRA 25

Perché è necessario uno strato di separazione?

Perché le crepe del massetto arrivano in superficie.

A high-angle photograph of a circular atrium. The floor is composed of large, light-colored tiles arranged in a complex geometric pattern of triangles and circles. In the center, there is a circular planter with a tiered, orange-colored border, containing a small Christmas tree and yellow and blue decorations. To the right, a staircase with a dark metal railing is visible. The overall scene is brightly lit, suggesting an indoor public space.
